

Pantoloc Control 20mg Gastro-Resistant Tablets

Uses

Short-term treatment of reflux symptoms (e.g. heartburn, acid regurgitation) in adults.

Dosage

Over 18 years: one tablet daily swallowed whole with liquid before a meal. It might be necessary to take the tablets for 2-3 days to achieve improvement of symptoms. Treatment should be discontinued once complete relief of symptoms has occurred. If no symptom relief after 2 weeks of continuous treatment a doctor should be consulted. Treatment should not exceed 4 weeks without consulting a doctor.

Under 18 years: not recommended.
