Canesflor Probiotics for Vaginal Use

Uses

Helps prevent the recurrence of vaginal infections, restores and maintains the natural environment in the vagina, reestablishes the vaginal microflora creating a protective barrier. Can be used as soon as (i.e. the next day) the appropriate medication for a vaginal infection is finished to help prevent recurrence.

Dosage

Women: insert 1 capsule deeply into the vagina while lying on the back before going to sleep. Use daily for 6 days and then 1 capsule per week for 4 weeks. Children: not to be given.
